DETAILED ACTION

1. The amendment and substitute specification filed 05/17/2004 have been entered.

- 2. Prosecution on the merits is reopened in view of Kobayashi(5,788,340).
- 3. Note attached DE10355224 to applicant. Has the German patent office rendered a search report?
- 4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 5. Claims 1 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Kobayashi(5788340).

Figures 1-2 of Kobayashi(5788340) disclose an electric parking brake with dual cams at 23a, 23b of gradually increasing radiuses, input shaft 15, output shaft within bearing 18, electric motor 6, friction member mechanism 4, brake pad 4-5. The last two lines of claim 1 recite only functional language unsupported by structure that would distinguish over Kobayashi (5788340).

6. Claims 2-3 and 5-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
